

SCIHEALTH INTRODUCES HOSPITAL LABOR COST MANAGEMENT PRODUCTIVITY SOLUTION

Hospitals to expect 2-8% overall reduction in salary costs.

ATLANTA, GA – 04/14/2008 – SciHealth announced today the release of the SciHealth Labor Cost Management (LCM) productivity solution. SciHealth LCM is a turn-key solution designed to enable acute responses to failures of hospital labor efficiency.

“We stand behind our pledge that hospitals should expect a 2-8% reduction in salary cost after deploying the LCM solution” said John Stigaard, SciHealth Co-Founder and COO.

SciHealth's Labor Cost Management (LCM) Solution is aimed at driving sustainable labor cost improvements through introducing opportunities for timely and targeted skills and staffing mix adjustments. SciHealth LCM is uniquely designed to be used as both a performance management solution for internal hospital managers as well as a tool for hospital consultants to actively monitor and manage progress of client hospitals.

“With total labor output stemming from thousands of individual decisions, SciHealth provides both consultants and client hospitals with a clear and uniform picture of otherwise fragmented staffing labor information” said Stigaard.

SciHealth LCM provides wide spread distribution of detailed labor metrics to key executives and managers who can quickly remedy negative staffing trends and outliers. A fully secure and tested technology platform combined with the ability to scale to thousands of concurrent users per location allows SciHealth LCM to be deployed in all size hospital and health system environments.

About SciHealth, Inc.

SciHealth, Inc. is a leading healthcare performance management software company, providing solutions to over 300 hospitals in the U.S., including some of the nation's premier providers.
