

RIVERSIDE HEALTH SYSTEM IMPROVES QUALITY SCORES USING SCIHEALTH

Riverside Acute Care Quality Score Increases 141%

ATLANTA, GA – 05/01/2008 – In an effort to consistently better quality performance, Riverside Health System implemented SciHealth INSIGHT as a system-wide quality scorecard in 2007. Over the next 12 months, the leadership team at Riverside institutionalized a focus on quality that yielded significant improvements in system-wide quality scores.

“By using INSIGHT and having a central point of reference for our 5,000+ employees, we better enabled our entire staff to read from the same sheet of music,” said Belinda Short, Director of Decision Support for Riverside Health System. “When everyone is focused on the same thing, rapid improvement follows. Our entire team has made a great effort to focus on quality, and the results speak for themselves.”

During the first 12 months using SciHealth INSIGHT, Riverside Health System posted a 141% increase in their Acute Care Quality Composite. This was followed by significant overall increases in their Long Term Care Quality Composite Score and in their Medical Group Quality Score. In addition, Riverside posted individual quality score improvements in many divisions including; Riverside's 570 bed Medical Center, Home Health, Hospice, Assisted Living, Independent Living and Rehabilitation.

“We applaud Riverside and their focus and commitment to quality,” said SciHealth CEO, Bill Leander. “It is no small undertaking to get an entire health system to achieve this level of performance. The team at Riverside is simply remarkable. We are pleased our solutions prove to be a useful tool in their continued accomplishments.”

About Riverside Health System
